FILTRATE LINER PIPES
CPVC
SCHEDULE 80

Threaded Fitting

Unthreaded Fitting

Pipe size is the accepted industry designation, not the actual measured size. To determine pipe size, first measure the inside diameter (ID) or outside diameter (OD) of a threaded fitting or the OD of unthreaded pipe, as shown at left. Then, round up the measurement to the closest ID or OD listed in the chart and select the corresponding pipe size. For example, if the fitting ID or OD measures 1 3/16", the next highest ID or OD in the chart is 1 3/8", and the corresponding pipe size is 1".

Threaded Fitting ID or OD	3/8"	1/2"	5/8"	3/4"	1"	1 3/8"	1 5/8"	1 7/8"	2 3/8"	2 7/8"	3 1/2"	4 1/2"	
Unthreaded and Pipe OD	1/2"	5/8"	3/4"	1"	1 1/8"	1 3/8"	1 3/4"	2"	2 1/2"	2 7/8"	3 1/2"	4 1/2"	6 3/4"
Pipe Size	1/8"	1/4"	3/8"	1/2"	3/4"	1"	1 1/4"	1 1/2"	2"	2 1/2"	3"	4"	6"
